Subject Index

Abilities, cognitive, 417–432
Acculturation, 250–262
Aggression, 77–89, 90–99
Angelman syndrome, behavioral phenotype, 311–321; effects of social stimuli on, 442–446
Assessment, of autism, 199–215
Attention, by adults, 170–183; selective, 199–215, 216–227
Attributions, 77–89, 90–99
Autism, and expressed emotions and behavior problems, 229–249; and mother-child relationship, 121–137; measurement of, 199–215
Autism Diagnostic Interview-Revised, 199–215
Autonomic function, 27–34

Behavior, maladaptive of adults, 250–262; problems, 48–62; problems and autism, 229–249; self-injurious, 170–183, 184–192
Bipolar disorder, 378–383

Cardiac control, 27–34
Caregivers, Hispanic, 250–262
Classification, on the basis of renormed tests, 311–321
Communication, 366–377; by individuals with Williams syndrome, 1–14; referential, 170–183. *See also* Speech
Coping, of families, 1–14
Cornelia de Lange syndrome, 184–192
Costs. *See* Economics

Deficit, in image inspection, 35–47
Depression, 100–112; comparative studies of, 155–169
Diagnosis, dual, 378–383
Distracters, and visual attention, 216–227
Distress, of mothers, 48-62
Down syndrome, and cardiac control, 27–34; and comprehension of grammar and speech, 138–152; and early social behavior, 273–289; and referential communication, 170–183

Economics, of person-centered planning, 400–416
Education, outcomes for preschool children with delays, 299–306
Emotion, 77–89, 90–99; expressed, 229–249; and facial recognition, 366–377; of mothers, 48–62; perception of, 15–26
Environment, effects of social communication, 170–183; influences on behavior, 311–321; effects of ethnicity on environment, 250–262
Exercise. *See* Fitness, physical

Families, environment of and autism, 229–249; importance of, 250–262; functioning of, 250–262; marital adjustment, 1–14
Feeding, tube,, 113–120
Fitness, physical, 27–34, 62–73

Fragile X syndrome, and referential communication, 170–183

g loadings, 417–432
Grammar, 138–152

Health, mental, 48–62; promotion of, 62–73; self-reported of Hispanic caregivers, 250–262
Hopelessness, 100–112

Infant, early social behaviors of, 273–289
Instruction, results of different instructional methods, 357–365
Intelligence tests, 322–335. *See* also individual tests
Interaction, mother-child, 121–137; mother-infant with Down syndrome, 273–289; social, 184–192, 311–321; with peers, 336–356
Intervention, for promoting social development, 336–356

Kappa, interrelation in observational research, 433–441

Language, nonverbal, 1–14; referential, 170–183
Laughing, in Angelman syndrome, 311–321, 442–447

Mania, 378–383
Maternal well-being, 48–61
Meta-analysis of studies of depression, 155–169
Minorities, overrepresentation in special education programs, 322–335
Mortality, and Prader-Willi syndrome, 193–198
Mothers, of children with autism, 229–249; and depression, 155–169; relationship with adolescent and adult children, 121–137. *See also* Families

Nutrition, 62–73

Obesity, 27–34; 62–73. 184–192; and mortality, 193–198
Outcomes, predictions based on early delays, 263–272, 273–289
Overinvolvement, of mothers, 48–62

Peabody Picture Vocabulary Test, 447–453
Perception, 35–47
Performance, difference with parts of intelligence tests, 417–432
Person-centered planning, 400–416
Perspectives, 77–89, 90–99
Placement, into programs, 311–321
Play groups, interaction in, 336–356
Pneumonia, effects of enteral tube feeding on, 113–120
Prader-Willi syndrome, and mortality, 194–198
Priming, inhibition of, 389–399; negative, 216–227
Processes, inhibitory, 216–227
Processing, 138–152

Quality of life, effects on person-centered planning on, 400–416

Reading, of sight words, 357–365
Research, observational, 433–441
Retention, rates of in regular vs. special education, 299–306

Scanning, visual, 35–47
Skills, social, 170–183, 336–356, 366–377
Smiling, 442–446
Speech, differentiated processing of, 138–152. *See also* Communication
Stimuli, overselectivity, 447–453; social and Angelman syndrome,
Stress, 1–14, 100–112; of Hispanic caregivers, 250–262

 © American Association on Mental Retardation

Tasks, emotion, 366–377
Teaching, of sight words, 357–365
Tests. *See* individual tests

United Kingdom, person-centered planning in, 400–416

Visual attention, 216–227

Wechsler intelligence tests, 311–321
Williams syndrome, and emotion, 1–14
Woodcock-Johnson, 417–432
